

Features

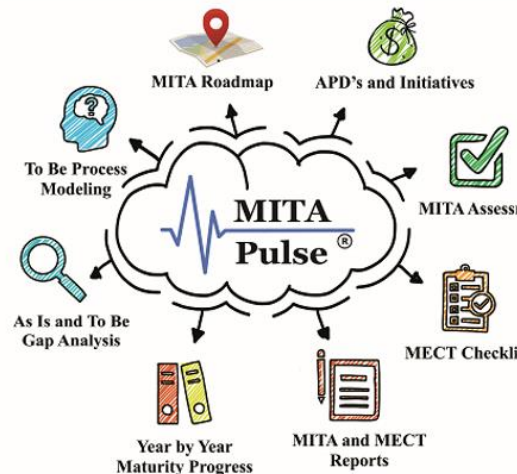

- Current with **MITA 3.0, MECL 2.3, MEET 1.1, MARS-E 2.0** specifications.
- Accessible on the cloud through a subscription model and no upfront cost to procure hardware and resources.
- Helps **State Medicaid Agencies/MMIS Vendors** to continuously monitor **Outcome** based maturity compliance for each MMIS/MITA module.
- Supports multiple and incremental assessments to track the as is maturity level and to plan the changes required to progress to the to be maturity level.
- Comes with the **80** MITA 3.0 business process models in BPMN 2.0 notation out of the box.
- Allows business process owners to model **as-is** business processes to identify gaps between **as-is** and **to-be** models
- Able to associate initiatives/projects to MITA maturity goals.
- Easy to use UI to complete the checklists and add evidence/documents to all the criteria for both MECT and MEET.
- Generates various interactive and standard (COO, Gap Analysis, Roadmap, eSSA etc.) MITA reports and filled-in MMIS/MEET checklists in the CMS format that can be submitted to CMS.
- Excel process templates are available for collecting data off-line from process owners that can be imported into MITA Pulse.

A collaborative application for reaching your MITA/MMIS/MEET/MARS-E assessment goals

Achieving Business Excellence with desired Business Outcomes is a continuous journey

MITA Pulse is a trusted partner in this journey

SourcePulse

A MITA/MMIS certification application for State Medicaid Agencies and MMIS Vendors

To answer the following MITA maturity questions:

- What is our current maturity level?
- What is our next target maturity level?
- How to bridge the gap?

To answer the following MMIS certification questions:

- Where are we in the certification process?
- How many system criteria we met in the MMIS module checklist?
- What evidence is provided to IV&V and CMS for each item in the checklist?

And more...

MITA Pulse is here to help -
